

INTERNATIONAL CONFERENCE

The Second International Conference on
Engineering and Technology Development

2nd ICETD 2013

27, 28, 29 August 2013, Bandar Lampung, Indonesia

PROCEEDINGS

In
Cooperations
With :

الجامعة الإسلامية العالمية
INTERNATIONAL ISLAMIC UNIVERSITY MALAYSIA
يؤيدوننا في العلم والابتكار ونظرا لما لنا عليه

Hosted by :

Faculty of Engineering and Faculty of Computer Science,
Bandar Lampung University (UBL), Indonesia

2nd ICETD 2013

THE SECOND INTERNATIONAL CONFERENCE
ON ENGINEERING AND TECHNOLOGY DEVELOPMENT

28 -30 January 2013
Bandar Lampung University (UBL)
Lampung, Indonesia

PROCEEDINGS

Organized by:

Faculty of Computer Science and Faculty of Engineering
Bandar Lampung University (UBL)
Jl. Zainal Abidin Pagar Alam No.89 Labuhan Ratu, Bandar Lampung, Indonesia
Phone: +62 721 36 666 25, Fax: +62 721 701 467
website : www.ubl.ac.id

PREFACE

The Activities of the International Conference is in line and very appropriate with the vision and mission of Bandar Lampung University (UBL) to promote training and education as well as research in these areas.

On behalf of the Second International Conference on Engineering and Technology Development (2nd ICETD 2013) organizing committee, we are very pleased with the very good response especially from the keynote speaker and from the participans. It is noteworthy to point out that about 80 technical papers were received for this conference.

The participants of the conference come from many well known universities, among others : University Kebangsaan Malaysia – Malaysia, APTIKOM – Indonesia, Institut Teknologi sepuluh November – Indonesia, Surya Institute – Indonesia, International Islamic University – Malaysia, STMIK Mitra Lampung – lampung, Bandung Institut of Technology – Bandung, Lecture of The Malahayati University, B2TP – BPPT Researcher – lampung, Starch Technology Center – Lampung, Universitas Islam Indonesia – Indonesia, Politeknik Negeri Malang – Malang, University of Kitakyushu – Japan, Gadjah Mada University – Indonesia, Universitas Malahayati – Lampung, Lampung University – lampung, Starch Technology Center – Lampung, Universitas Riau – Riau, Hasanuddin University – Indonesia, Diponegoro University – Indonesia, King Abdulaziz University – Saudi Arabia, Parahyangan Catholic University – Indonesia , National Taiwan University– Taiwan, Surakarta Christian University – Indonesia, Sugijapranata Catholic University – Indonesia, Semarang University – Indonesia, University of Brawijaya – Indonesia, PPKIA Tarakanita Rahmawati – Indonesia, Kyushu University, Fukuoka – Japan, Science and Technology Beijing – China, Institut Teknologi Sepuluh Nopember – Surabaya, Researcher of Starch Technology Center, Universitas Muhammadiyah Metro – Metro, National University of Malaysia – Malaysia.

I would like to express my deepest gratitude to the International Advisory Board members, sponsor and also to all keynote speakers and all participants. I am also gratefull to all organizing committee and all of the reviewers who contribute to the high standard of the conference. Also I would like to express my deepest gratitude to the Rector of Bandar Lampung University (UBL) who give us endless support to these activities, so that the conference can be administrated on time

Bandar Lampung, 29 August 2013-08-26

Mustofa Usman, Ph.D
2nd ICETD Chairman

PROCEEDINGS

2nd ICETD 2013

The Second International Conference
On Engineering And Technology Development

28 -30 January 2013

Table Of Content

Organizing Committee	i
Table Of Content.....	v
Keynote Speaker	
1. Recent Advances in Biofuel Cell and Emerging Hybrid System Abdul Aziz Ahmad and Raihan Othman	1
2. Waste Utilization Study Tailing Gold Mine in Way Linggo-Lampung, as Fine Aggregate Materials for Producing Mortar Materials based on concept of Green Technology Lilies Widodojoko & Susilawati	8
3. Infrastructure Health Monitoring System (SHM) Development, a Necessity for Maintance and Investigation Prof. Dr. Priyo Suprobo, Faimun, Arie Febry	17
4. Four Phases Quality Function Deployment (Qfd) By Considering Kano Concept, Time And Manufacturing Cost Prof. Dr. Moses L Singgih, Dyah L. Trenggonowati, Putu D. Karningsih	22

Speaker

1. Comparative Analysis for The Multi Period Degree Minimum Spanning Tree Problem
Wamiliana, Amanto, and Mustofa Usman..... 39
2. Choosing The Right Software In Supporting The Successful of Enterprise ERP Implementation
Yodhie Yuniarthe, Idris Asmuni..... 44
3. Climate Adaptive Technology In Maintaining Vernacularism Of Urban Kampong Case study: Kampung Adat (Indiginous) Mahmud, Bandung District, West Java
Marcus Gartiwa..... 50
4. The Prospect Of Diesohol In Facing Fossil Fuel Crissis
M.C. Tri Atmodjo..... 63
5. The Potential Of Agriculture And Forestry Biomass Wastes As Source Of Bioenergy
Hardoyo..... 66
6. The Importance of Education Facility as Sustainable Urban Generation Tool
Fritz Akhmad Nuzir, Haris Murwadi and Bart Julien Dewancker 71
7. The implementation of Secton Method for Solving Systems of Non Linear Equations
Nur Rokhman 80
8. Quality Control Analysis Into Decrease The Level Defects On Coffee Product
Heri Wibowo, Sulastri and Emy Khikmawati 85
9. Public Transpotion Crisis In Bandar Lampung
Ida Bagus Ilham Malik 89
10. Geospatial Analysis of Land Use Change in Way Kuripan Watershed, Bandar Lampung City
Candra Hakim Van Rafi'1., Dyah Indriana Kusumastuti2., Dwi Jokowinarno..... 99
11. Material Utilization Technology Of Agriculture And Forestry Waste
Hardoyo..... 105
12. The Supply Chain System Of Cassava On The Tapioca Industry
Hardoyo..... 108
13. Glass Technology In Natural Light Glasses On Aperture Element In The Architecture World
Muhammad Rija & MT Pedia Aldy 113

14. An Eksperimental Permeable Asphalt Pavement Using Local Material Domato Stone On Quality Of Porous Asphalt
Firdaus Chairuddin, Wihardi Tjaronge, Muhammad Ramli, Johannes Patanduk 117
15. Coordination Of Architectural Concepts And Construction Systems
Eddy Hermanto. 129
16. Seismic Assessment of RC Building Using Pushover Analysis
Riza Ainul Hakim...... 136
17. Viscosity and Liquidity Index Relation for Elucidating Mudflow Behavior
Budijanto Widjaja and Shannon Hsien-Heng Lee...... 143
18. The Use of Pozzolanic Material for Improving Quality of Strontium Liquid Waste Cementation in Saline Environment during Nuclear Waste Immobilization Process
Muhammad Yusuf, HayuTyasUtami, Tri SulistiyoHariNugroho, SusetyoHarioPutero 148
19. Geospatial Analysis Of Land Use And Land Cover Changes For Discharge At Way Kualagaruntang Watershed In Bandar Lampung
Fieni Yuniarti, Dyah Indriana K, Dwi Joko Winarno...... 153
20. Wifi Network Design For High Performance
Heru Nurwarsito, KasyfulAmron,BektiWidyaningsih 161
21. Studi on The Efficiency Using Nature Materials in The Structural Elements of Reinforced Concrete Beam
Yasser, Herman Parung, M. Wihardi Tjaronge, Rudy Djamaluddin...... 167
22. The Research Of Slow Release Nitrogen Fertilizer Applied In Sugarcane (Saccharum Officinarum) For Green Energy Bioethanol
M.C. Tri Atmodjo, Agus Eko T. Nurul Rusdi, Sigit Setiadi, and Rina...... 179
23. Energy Utilization Technology Of Agriculture And Forestry Waste
Hardoyo...... 185
24. Implementation Of Fuzzy Inference System With Tsukamoto Method For Study Programme Selection
Fenty Ariani and Robby Yuli Endra. 189
25. The Analysis of Video Conference With ITU Standarization (International Telecommunication Union) That Joining in Inherent At Bandar Lampung University
Maria Shusanti F, Happy Reksa 201

26. The E-internal audit iso 9001:2008 based on accreditation form assessment matrix in study program for effectiveness of monitoring accreditation
Marzuki, Maria Shusanti F. 207
27. The Developing Of e-Consultations For Effectiveness of Mentoring Academy
Ahmad Cucus, Endang K 214
28. The Evaluation of information system performance in higher education case study with EUCS model at bandar lampung university
Reni Nursyanti, Erlangga. 221
29. The Analysis Of History Collection System Based On AndroidSmartphone With Qr Code Using Qr CodeCase Study: Museum Lampung
Usman Rizal, Wiwin Susanty, Sutrisno...... 230
30. Application of Complaint Handling by Approach Model of ISO 10002 : 2004 to Increase Complaint Services
Agus Sukoco and Yuthsi Aprilinda. 235
31. Towards Indonesian Cloud Campus
Taqwan Thamrin, Iing Lukman, Dina Ika Wahyuningsih 252
32. Bridging Router to ADSL Modem for Stability Network Connection
Arnes Yuli Vandika and Ruri Koesliandana...... 257
33. The Effect of Use Styrofoam for Flexural Characteristics of Reinforced Concrete Beams
Yasser , Herman Parung, M. Wihardi Tjaronge, Rudy Djamaluddin 261
34. The Estimation Of Bioethanol Yield From Some Cassava Variety
M.C. Tri Atmodjo..... 273
35. Effect of Superficial Velocity of Pressure Difference on The Separation of Oil And Water by Using The T-Pipe Junctionl
Kms. Ridhuan and Indarto...... 277
36. The use of CRM for Customer Management at Cellular Telecommunications Industry
Ayu Kartika Puspa...... 293
37. Indonesian Puslit (Centre Of IT Solution) Website Analysis Using Webqual For Measuring Website Quality
Maria Shusanti Febrianti and Nurhayati. 297
38. The E-internal audit iso 9001:2008 based on accreditation form assessment matrix in study program for effectiveness of monitoring accreditation
Marzuki, Maria Shusanti F. 307

39. Enhancing Quality Software Through CMMI-ISO 9001:2008 and ISO 9126 Agus Sukoco	320
40. Value Analysis Of Passenger Car Equivalent Motorcycle (Case Study Kartini Road Bandar Lampung) Juniardi, Aflah Efendi	337
41. Alternative Analysis Of Flood Control Downstream Of Way Sekampung River Sugito, Maulana Febramsyah.	347
42. Analysis Of Fitness Facilities And Effective Use Of Crossing Road Juniardi, Edi Haryanto.	353
43. Study On Regional Development Work Environment Panjang Port Lands In Support Bandar Lampung City As A Service And Trade Ir. A. Karim Iksan, MT, Yohn Ferry.	359
44. Analytical And Experimental Study Bamboo Beam Concrete Hery Riyanto, Sugito, Juli	370
45. Comparative Analysis Of Load Factor Method Static And Dynamic Method (Case Study Akdp Bus Route Rajabasa - Bakauheni) A. Ikhsan Karim, MT., Ahmad Zulkily.	378
46. Optimization Utilization Of Water Resources dam Batutege Using Method Of Linear Program Aprizal, Hery Fitriyansyah	386
47. Characteristics Generation Traffic Patterns And Movement In Residential Area (Case Study Way Kandis Residential Bandar Lampung) Fery Hendi Jaya, Juniardi,	392
48. Use Study On Slight Beam Reinforced Concrete Floor Plate in Lieu Of Secondary Beam Hery Riyanto, Sugito, Lilies Widodjoko, Sjamsu Iskandar	399
49. Observation Of The Effect Of Static Magnetic Field 0.1 Mt On A-Amylase Activity In Legume Germination Rochmah Agustrina, Tundjung T. Handayani, and Sumardi.	405
50. Effectiveness Analysis Of Applications Netsupport School 10 Based Iso / Iec 9126-4 Metrics Effectiveness Ahmad Cucus, Nelcy Novelia	413

THE RESEARCH OF SLOW RELEASE NITROGEN FERTILIZER APPLIED IN SUGARCANE (*Saccharum officinarum*) for GREEN ENERGY BIOETHANOL

M.C. Tri Atmodjo, Agus Eko T. Nurul Rusdi, Sigit Setiadi, and Rina
BPPT Researcher

Jl. Z.A. Pagaralam no 8/36 Bandarlampung

E-Mail : atmojo_b2tp@yahoo.com

Abstract : *This Research was conducted in order to find out the influence of Slow Release Nitrogen Fertilizer and Nitrogen Fertilizer for sugarcane plant as the raw materials of green energy bioethanol. The Sugarcane plant needs fertilizer in order to improve plant productivity. The chemical fertilizer usually not circumstance friendly but the slow release chemical fertilizer may have something different. The application of slow release chemical fertilizer may be better for soil fertility. The application of slow release nitrogen fertilizer in GMP 2 and Kidang Kencana sugarcane plant seemed better rather than ordinary nitrogen fertilizer in Yellow – Red Podzolic Soil in Negara Bumi Ilir, Center of Lampung.*

Keywords : *Kidang Kencana, GMP2, Sugarcane, Nitrogen Fertilizer, Slow release Fertilizer.*

INTRODUCTION

The mineral (sandy) soils typically have very low soil Organic Matter (OM) contents, so the soil-N supply from native soil OM can be expected to be very low, and crop availability of this N supply will likely be diminished by soil-N movement during rainfall events.

There is no fertilizer is recommended for sugarcane grown on muck soils. On organic soil, N deficiencies are rarely seen in sugarcane. A deficiency may appear if organic N cannot be mineralized under unfavourable conditions, such as flood.

It is also widely recognized that the sandy soils cropped to sugarcane are variable in terms of native soil OM contents, cation exchange capacities (CEC), and to some degree, soil pH. These factors affect native soil-N supply, and can vary considerably across adjacent 20-acre fields, and even within any given

20-acre field block. Regardless of this variability, the native soil OM and CEC for any of these sandy soils is considered low. Nitrate pollution in ground water has become a serious problem worldwide; one of its causes is known to be the excessive use of nitrogen fertilizers in agricultural production. Using water containing nitrate-nitrogen concentrations above the standards of the World Health Organization's (WHO) (10 mg/L) leads to agricultural products becoming unsuitable for human consumption, particularly for infants ("blue baby disease").

One possibility to solve the nitrate-nitrogen pollution of subsurface is necessary to applied controlled-release N-fertilizer to sugarcane. Nowadays Indonesia is doing the research of some alternative of biofuel production which renewable of raw materials and circumstance kindly. There are many kind of excellence biomass as raw materials in Indonesia such as cassava, corn, sweet

potato, sweet sorghum, sugarcane and etc. There are many kind of Sugarcane variety (*saccharum officinarum*) in Indonesia which suitable with the regional agroclimate.

The application of slow release nitrogen fertilizer in GMP 2 and Kidang Kencana variety of sugarcane plant would seemed better rather than ordinary nitogen fertilizer in Yellow – Red Podzolic Soil in Negara Muni Ilir, Center of Lampung.

The objective of this reserach were to find out the influence of slow release nitrogen fertilizer in sugarcane plant as raw materials of bioethanol for GMP 2 and Kidang Kencana variety respectively.

2.MATERIALS AND METHOD

Randomized block design with 2 repetition, 8 treatment that is V1 was Kidang Kencana and V2 was GMP2 respectively. The application of Nitrogen fertilizer were P1 = 300 kg/ha urea, P2 = 300 kg/ha urea SRF, P3=200 kg urea SRF, and P4 = 100 kg/ha urea SRF. The treatment code are V1P1, V1P2, V1P3, V1P4, V2P1, V2P2, V2P3 and V2P4. The total acreage were 0.3 hectares. Planting date : April 30, 2012

Data collected : Height of plant and diameter of stem every month since 3 month old until 7 month old, total weight of biomass and total sugar of juice of sugarcane, volume of juice in each stem(Total sugar of juice by somogy's method) and bagasse weight in 6 month old until 7 month old.

Harvesting date : Since October 2012 with 10

sample in each treatment with 2 repetition.

Total acreage of experimental block = 0,30 hektar

Basic of fertilizer in each block was applied as follow (Anonimous, 2001).

Urea according to each treatment P1,P2,P3 and P4 (2/3 of each dosage respectively)

TSP ...250.....kg/ha..(115 kg P2O5/ha)

KCl...150.....kg/ha(90 kg K2O/ha)

In 2 month old of plant was applied second fertilizer that is (Anonimous, 2001).

Urea 1/3 of each dosage respectively.

KCl 150..... kg/ha (90 kg K2O/ha)

Plant spacing : Intra row = 1,0 meter(14 row in a block). Spacing = 30 cm in row

3.RESULT AND DISCUSSION

The Result of this research in 3 month old until 7 month old was showed in fig 1 until fig 12.

Fig 1. The Mean plant growth of Kidang Kencana (Left) and GMP2 (right)

The mean plant growth since 3 month until 7 month showed that GMP 2 was higher rather than Kidang Kencana as illustrated in Fig. 1. GMP 2 seemed more suitable rather than Kidang kencana by Slow release nitrogen fertilizer.

Fig 2. The plant growth of Kidang Kencana from 3 month until 7 month old

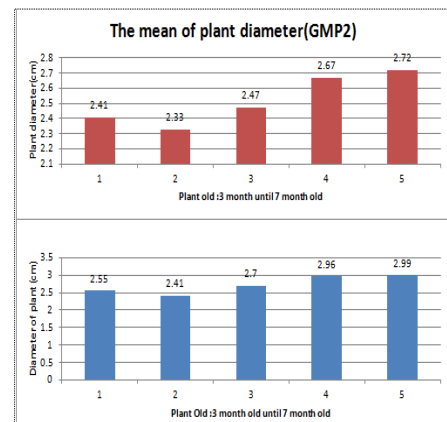

Fig 3.. The plant growth of GMP2 from 3 month until 7 month old

GMP2 seemed had better plant height rather than Kidang kencana in the application of Slow Release Nitrogen Fertilizer. GMP2 more suitable rather than Kidang kencana by the application of slow release Nitrogen fertilizer.(fig2 and fig 3).

The mean of plant diameter (Kidang Kencana)

Fig 4. The Mean of plant diameter of GMP2 (Left) and

Kidang Kencana (right).

Kidang Kencana seemed had better diameter size of stem rather than GMP 2 in the application of Slow Release Nitrogen Fertilizer. In 4 month old of plant ,the hot weather and no rainfall decreased the diameter of plant (fig 4.)

The total sugar V1P1 in 6 month old is the biggest indicated that Kidang Kencana suitable with uncoated nitrogen fertilizer. V1P2 showed lower total sugar than V1P1 and indicated that coated nitrogen fertilizer 300 kg/hectar seemed suitable for Kidang Kencana. GMP 2 seemed suitable with 200 kg/ha and 100 kg/ha coated nitrogen fertilizer.

Fig 5. The mean Total sugar of Kidang Kencana and GMP 2 in 6 month and 7 month old

Kidang Kencana seemed had better total sugar rather than GM2 in the

application of Slow Release Nitrogen Fertilizer. Kidang Kencana more suitable rather than Kidang kencana by the application of slow release Nitrogen fertilizer.(fig5, fig 6 and fig 7).

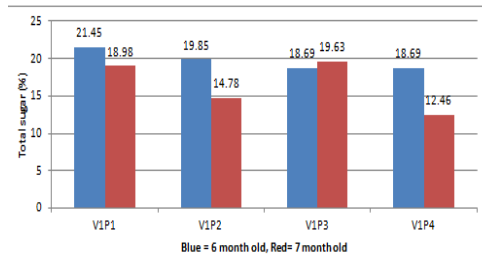

Fig 6. The Total Sugar of Kidang Kencana in 6 month and 7 month old

The total sugar of Kidang Kencana and GMP 2 is better in six month old of plant rather in 7 month old of plant. The highest total sugar was obtain by 300 kg/ha nitogen fertilizer and 300 kg /ha slow release nitrogen fertilizer respectively (fig 6).

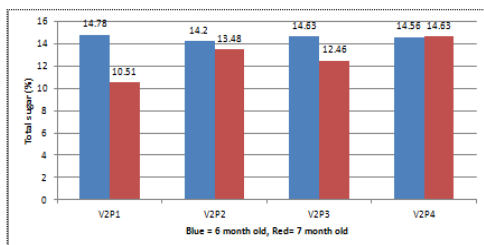

Fig 7. The Total Sugar of GMP2, 6 month and 7 month old

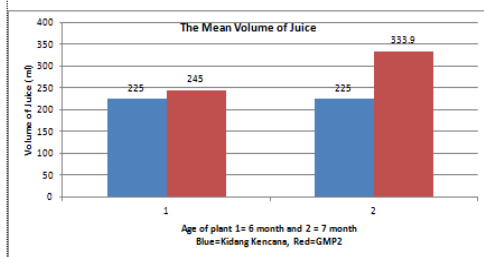

Fig 8. The Mean volume of juice of Kidang Kencana (Blue) and GMP2 (right)

GMP2 seemed had better volume of stem juice rather than Kidang kencana

in the application of Slow Release Nitrogen Fertilizer

Fig 9. The Weight of bagasse of Kidang Kencana (Blue) and GMP2 (red)

GMP2 seemed had better weight of baggase rather than Kidang Kencana in the application of Slow Release Nitrogen Fertilizer in 6 month and 7 month old of plant respectively. But Kidang kencana seemed had better weight of baggase rather than GMP 2 without the application of Slow Release Nitrogen Fertilizer.

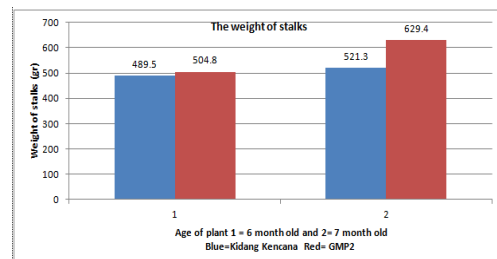

Fig 10. The Mean Weight of stalks of Kidang Kencana (Blue) and GMP2 (right)

GMP2 seemed had better weight of stalks rather than Kidang kencana in the application of Slow Release Nitrogen Fertilizer in 6 month and 7 month old of plant respectively. But Kidang kencana seemed had better weight of stalks rather than GMP 2 without the application of Slow Release Nitrogen Fertilizer.

Fig 11. The Mean stalks weight per plant in 6 month and 7 month old in each treatment.

The stalks weight in 6 month old of plant for Kidang Kencana more than 600 gram per plant equal to 120 ton per hectare by application of 300 kg/ha Nitrogen fertilizer. By the data of stalks weight, GMP2 seemed more suitable with the application of slow release nitrogen fertilizer mainly in 7 month old of plant.

Fig 12. The Mean Total sugar in 6 month and 7 month old of plant in each treatment

The total sugar of Kidang Kencana and GMP 2 is better in six month old of plant rather in 7 month old of plant. The highest total sugar of Kidang Kencana was obtain by 300 kg/ha nitrogen fertilizer and 300 kg /ha slow release nitrogen fertilizer respectively (fig 12).

Indeficiencies can readily occur in sugarcane grown on sandy soils such like Yellow Red Podzolic Soil in Negara Bumi Ilir. Multiple applications of N fertilizer are often required during the growing season to sustain adequate sugarcane production on mineral (sandy) soils, which lack the high organic N contents of muck soils. Failing to supply adequate N during critical growth periods can result in stunted plants, premature

ripening, and reduced biomass and sugar yields. Nitrogen has the greatest influence on cane ripening of all the nutrient elements. Cane will store a higher percent of sucrose when N is limited 6 to 8 weeks prior to harvest. Although a late-season N deficiency can actually promote improved sugarcane ripening, this scenario is unlikely to be achievable on organic soils.

Since N is a mobile nutrient, N-deficiency symptoms are first observed on older leaves (since N is mobilized from older tissues in favor of supporting growth in new tissue), although deficiency symptoms can eventually be seen over the entire plant. Leaf blades become uniformly pale-green to yellow, stalks become short and slende.

4.CONCLUSSION

Results of a field experiment with sugarcane showed that the treatment of urea with slow release nitrogen fertilizer (coated nitrogen fertilizer) increased its efficiency by preventing N losses, resulting in significantly higher cane yields. In one of the years, sulphur-coated urea at **300 kg N/ha** gave higher total sugar content in the juice and significantly more commercial cane sugar (CCS) than uncoated urea.
